

**DEPARTMENT OF PHYSICS AND PHYSICAL  
OCEANOGRAPHY COLLOQUIUM**

**“Experimental Neutrino Physics”**

**Christopher Walter**

**Assistant Professor, Department of Physics  
Duke University**

**In this talk, I will introduce the field of neutrino physics and will review how a set of experiments in the last decade have given us our current understanding of neutrino properties. I will also discuss how new experiments about to start will address remaining questions.**

**Friday, September 26, 2008  
2:00 PM  
DeLoach Hall, Room 212**

**Refreshments will be served at 1:45 PM**
