

**DEPARTMENT OF PHYSICS AND PHYSICAL  
OCEANOGRAPHY COLLOQUIUM**

**“Using a Physics Degree in Industry”**

**Earl F. Saito**

**GE Hitachi Nuclear Energy**

What can one do with an undergraduate degree in Physics and Chemistry. Get a graduate degree? This talk will describe how I used my science education in fields dominated by engineers and managers. With the end of the cold war nuclear physics degrees were not highly sought after. However, the problem solving skills and basic science skills have been very useful. Understanding the fundamentals of nuclear allow a different problem solving approach and higher level math skills allow success in finance.

**Friday, January 23, 2009**

**2:00 PM**

**DeLoach Hall, Room 212**

Refreshments will be served at 1:45 PM
