

Ally assists instructors in assessing and improving the accessibility of their course content in Canvas. It is important to note that Ally doesn't change how anything works in a course and won't affect course files.

## Alternative Formats

Ally automatically generates "alternative formats" of course files and makes them available to instructors and students by clicking the dropdown icon next to the file name.

## Indicators

Within Canvas, Ally provides indicators that are not visible to students as to the accessibility of many types of files; what, if any, the accessibility issues are; why they matter; and how to fix them.
