

Breast Health: What's Normal and What's Not in Men & Women

What's Normal? What's Not? is a fast-paced, fun, and interactive workshop that provides participants with potentially life-saving breast health information. The hope is that those who participate will use the techniques and tips in their daily lives and that they will share the information with others with which they work, live, and socialize.

Health and Human Services Week

April 4, 2019; 9:00am to 10:45am

UNCW Campus, McNeill Hall 1051
