

Mary Patrice Murray, MSN

Objective

To maintain clinical skills as Registered Nurse, maintain interaction with Nursing students and patients and in the future to recertify and practice as a Family Nurse Practitioner license and obtain my Doctorate in Nursing Practice (DNP).

Experience

2014 - present Pharmaceutical Products Development Wilmington, NC

Safety Specialist: Pharmacovigilance

- Collaborated on litigation case.
- Trained for post-approval case processing.
- Collection, monitoring, assessment, evaluation, research and tracking of safety information.
- Coordinates and performs adverse event data entry, coding and assessment of adverse events, case review, follow-up, tracking of reports, and regulatory reporting activities.
- Collaborates with various parties such as: project team members, client contacts, investigators, and adverse event/ reporters, and third party vendors.
- Works independently to receive, triage, manage, and reconcile adverse event reports, including those reported in the scientific literature, in accordance with contractual and regulatory timelines. Manages adverse events and endpoints which may include review of complex medical records, preparation of adverse event narratives and coding of event terms utilizing MedDRA. Assigns preliminary seriousness and labeledness/listedness of event(s). Works within multiple databases. May interact with clients, health care professionals, clinical trial personnel and consumers.
- Reviews regulatory/pharmacovigilance publications and information sources to keep updated on current regulations, practices, procedures and proposals. Maintain medical understanding of applicable therapeutic area and disease states. May participate in on-call duties for specific projects to ensure 24-hr coverage for safety reporting. Performs other duties as assigned.
- Reviews cases entered for quality, consistency and accuracy, including review of peer reports.
- Prepares and maintains regulatory safety reports.
- Assists with routine project implementation and coordination (e.g., Clinical Trials, Endpoint Assessment Committee/Data Safety Monitoring Committee), including presentations at client/investigator meetings, and review of metrics and budget considerations. Mentors less experienced staff.

May 2016- Present Miller Motte Community College Online Adjunct Faculty

- Facilitate class discussions for up to 34 online students for 5-6 week online course.
- Grade and give feedback on class discussions, discussion replies, journals, assignments and projects due weekly.
- Perform any mid-term evaluations on students below at 70 % average at mid-term.
- Council 1:1 if student needs extra support.
- Utilize Moodle Messaging System for online course rubrics and grading.

Mary P. Murray
