Monica Jain, founder and executive director of Fish 2.0 and Manta Consulting Inc., is dedicated to growing networks that bring together her top passions: fisheries and the oceans, finance, and impact investment. She launched Fish 2.0 in 2013 to create a network of quality entrepreneurs and investors who could grow the sustainable seafood sector. Since then, she has worked with over 600 entrepreneurs, 500 investors, and 50 sponsors, including UNCW, to expand Fish 2.0.

Monica was named a White House Champion of Change for Sustainable Seafood in October 2016 for her achievements with Fish 2.0 and her long-standing work advancing ocean conservation and sustainable seafood. Her career spans 30 years and four continents, encompassing marine biology, philanthropy, venture capital, banking, and international development in such far-flung locales as New Zealand, Madagascar, Latin America, and Spain, as well as in the United States.

She currently continues her work as a strategic advisor and consultant to government, investors, and corporations, helping them reduce barriers to growth of sustainable seafood innovation, drive investment into this field, launch initiatives, and build partnerships. Monica holds degrees from Stanford University and the Wharton School of Business.
