

Learning Goal 5: Our students will demonstrate an understanding of global business practices that embraces the opportunities of multicultural, diverse environments, as they relate to local, national and global operations.

(Updated November 2010)

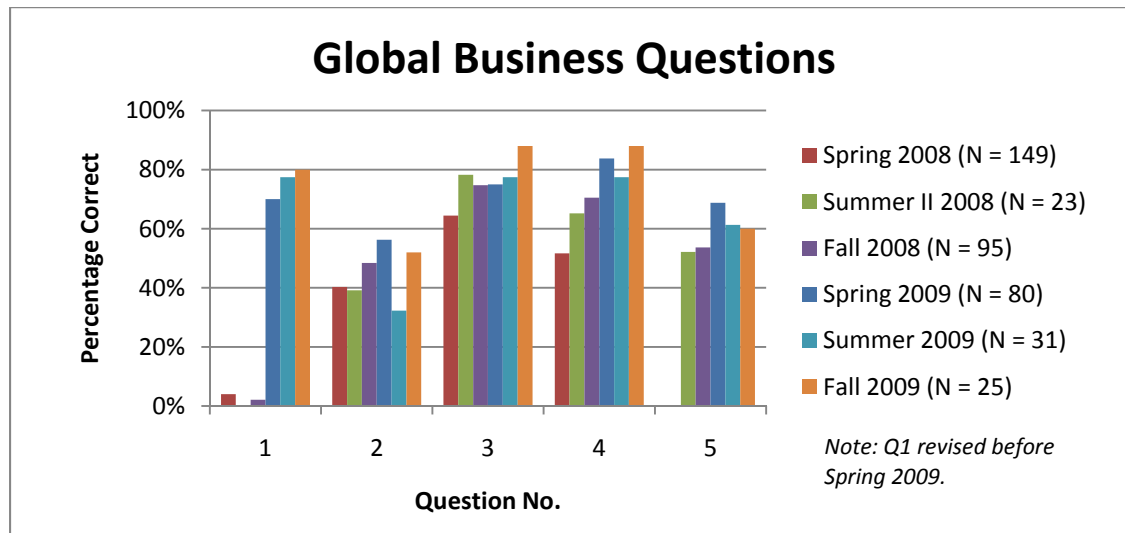

**Global Business Assessments
Summer 2010 Update**

Actions Taken:

The IB committee has reviewed the data and is now in the process of evaluating a potential capstone course for IB majors as a result of this information. The IB committee is presently satisfied with the results.

**Global Business Assessments
December 2009 Update**

Actions Taken:

On Friday, January 15, 2010, the CSB International committee met to review the data for the questions related to the assessment on content knowledge related to all aspects of international business. The original questions were developed by a team of three faculty who did or would teach the course. After much discussion, the committee asked the three faculty to review the questions again as there was belief that the three questions did not reflect a broad enough coverage from the INB300 survey class. It is requested that a report come back to the IB committee for its February meeting.
