

Recording with Camtasia for MAC

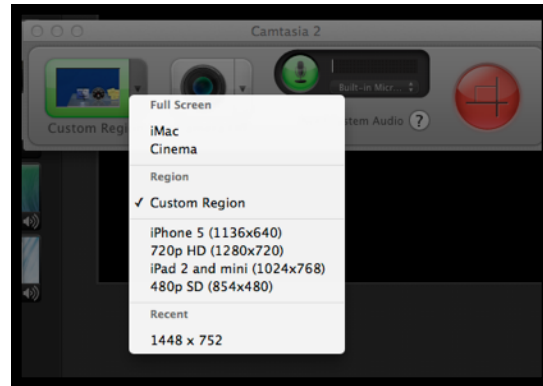

The following steps will guide you through the process of recording your computer screen and/or webcam using Camtasia Studio on a MAC.

For more tutorials on Camtasia for MACs visit: <http://www.techsmith.com/tutorial-camtasia-mac-current.html>

1. Click the **red button** on the bottom left of the screen.

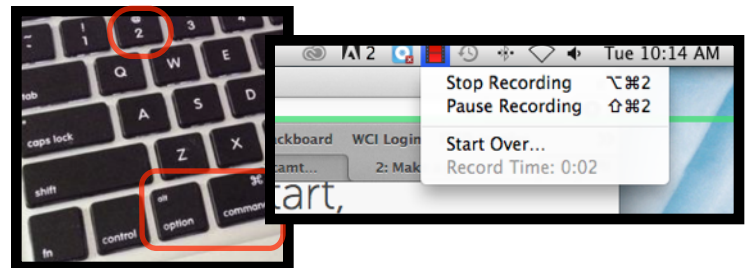

2. A box will appear that enables you to change the area of the screen being recorded. Recording the Full Screen is the default. If you want a section of the screen to record, select Custom Region.

3. To record **video**, turn the camera video on/off. To record **voice** turn the **Audio** on. In the drop down audio menu, select the one that is **NOT Built-in Microphone**.

4. Hit **Record**. A countdown will appear on screen (3...2...1). After the countdown your audio and screen will start recording.

5. To stop recording hold **Alt + Command + 2** on your keyboard or find the red film symbol **on the task bar** and click for the drop down menu.

6. When **paused**, a dialog box will appear to name the file and either complete, delete or resume the recording. The recording will then appear at the top left of your screen in Camtasia.
