Summer 2018 brought the return of Summer Ventures in Science and Mathematics to the UNCW campus after a seven year hiatus. Summer Ventures is a state-funded program for academically talented North Carolina students who aspire to careers in science, technology, engineering and mathematics. For 25 years the program brought some of North Carolina's most talented and highly motivated high school students to UNCW's campus for research experiences in STEM. The program resumed this summer with 48 high school juniors and seniors interested in conducting research alongside university faculty. Courses were focused on coastal geology, forensic anthropology, health science and fitness technology, and physics.
