Rationale for Request

The student should provide an explanation of how the work completed in the course meets the Student Learning Outcomes (SLOs) associated with Writing Intensive and/or Information Literacy. (Please refer to the Writing Intensive and Information Learning sites for the SLOs.) The student should also submit as many of the following materials as possible: the course description (from the university catalogue), the course syllabus, a description of assignments. (A copy of relevant work completed in the course may be useful if any of the above are not available.) These materials will provide the basis for assessing congruence with the Writing Intensive or Information Literacy SLOs.

The Faculty Advisor should evaluate the described course according to how well it meets the Student Learning Outcomes for the WI and/or IL components. (A separate sub/waiver form should be used if this course also fulfills another University Studies and/or major requirement.)
