NOAA MARINE DEBRIS PREVENTION THROUGH EDUCATION

TOOTHBRUSHES

**INSTEAD OF USING A PLASTIC TOOTHBRUSH, TRY
A NEW SUSTAINABLE BAMBOO BASED TOOTHBRUSH**

CAMPAIGNS

Toothbrushes are one of the most commonly found items in the stomachs of birds. Want to help, but unsure of what to use instead of a plastic toothbrush? Check out these eco-friendly alternatives to plastic toothbrushes

[For more information, click here.](#)

Recycling your toothbrush is important – this ensures it cannot become marine debris that animals may confuse for their fish prey
