# UNIVERSITY STUDIES

2022-2023 Draft

IL: Information Literacy

WI: Writing Intensive

CR: Critical Reasoning

The University Studies Curriculum encourages students to begin a life-long journey of engaged inquiry and societal contribution. As a consciously integrated component of each student's overall education experience, the program reflects our institution's fundamental commitment to fostering ethical and intellectual development and to promoting the growth of well-informed, creative, literate members of society. University Studies first establishes the basis of an essential liberal education through a multi-faceted exploration of our diverse intellectual heritage. As it extends through each student's educational career, University Studies builds upon this foundation through a course of study designed to cultivate the skills and capacities students require to respond to and anticipate the complexities of modern citizenship in an inclusive and creative manner.
